

secret interstellar spacecraft use superluminal tachyon - a fleet of spacecraft have been secretly constructed using tachyon drives that are capable of interstellar travel at superluminal speeds this astounding conclusion emerges from the disclosures of a whistleblower claiming to have served for 20 years on several secret space programs, **self replicating spacecraft wikipedia** - theory in theory a self replicating spacecraft could be sent to a neighbouring planetary system where it would seek out raw materials extracted from asteroids moons gas giants etc to create replicas of itself, **extraterrestrial intelligence hypothetical lifeform** - extraterrestrial intelligence extraterrestrial intelligence hypothetical extraterrestrial life that is capable of thinking purposeful activity work in the new field of astrobiology has provided some evidence that evolution of other intelligent species in the milky way galaxy is not utterly improbable, **nasa confirms voyager 1 probe has entered interstellar space** - the spacecraft has travelled further from earth than any other man made object in existence despite confusion over what constitutes interstellar space, **do tachyons really exist astronotes** - tachyons hypothetical sub atomic particles which travel faster than light once attracted a lot of publicity yet we do not hear much discussion of them today, **interstellar trade atomic rockets** - traveller type a free trader beowulf mesh model by jaythurman cyberia23 this section is basically a rough outline of rick robinson s interstellar trade a primer you d probably be better off reading the full article but some people want executive summaries, **possibility is thrust of 100 year starship study the new** - more advanced nuclear engines could use reactors to generate electric fields that accelerated charged ions for the thrust then fusion engines producing energy through the combining of hydrogen atoms could finally be powerful enough for interstellar travel, **oumuamua is an alien probe with broken engines daily** - dr jason wright from penn state university suggests that an alien spacecraft whose engines have failed would move in exactly the same way as the interstellar asteroid, **astronomers spot first known interstellar comet sky** - telescopes only picked it up a week ago but it s likely been traveling through interstellar space for millions of years, **local interstellar cloud and galactic superwave effects on** - illustration courtesy of linda huff american scientist priscilla frisch u chicago though we may have already been inside what is known as the local interstellar cloud for tens or hundreds of thousands of years scientists have been discussing regional areas aka cloudlets of variable density that we may have entered into as, **ex astris scientia timeline early space travel 1967 2160** - timeline early space travel 1967 2160 until 1966 1967 2160 2161 2264 2264 2299 2300 2363 2364 2379 possible future abramsverse 1967 the timeship aeon from the 29th century crashes in the high sierra in california and is salvaged by henry starling who will exploit its technology to found the company chronowerx and initialize the computer
